Health Department of the old city of Brooklyn, and Dr. and Mrs. R. C. Baker, also of the department, were of the party. Mr. Strauss had been prohibited from marrying again in the State of New York, but had for more than a year been making love to me. He proposed that we be married at the camp. I acquiesced, a ciergyman was sent for and so we were married.

"Six children were born to us of this marriage, of whom five are dead and one living, a boy named Franklin J. Strauss, now ten years of age. My husband was constantly away from home, but my suspicions were not aroused until January or February last, when because of his continued absences from home, which he excused on the ground of politics and business, I looked through his clothes one night and discovered a commutation ticket entitling my hustand to travel between Plainfield. N. J., and this city.

"I went to Plainfield the next day and inquired of the hackmen at the depot if they knew of one Baldwin F. Strauss, 'Oh, yes,' they replied, in chorus, 'you mean Mr. Baldwin F. band uneasily, and then I told him of what I had learned."

In her petition to the court Mrs. Strauss says of this incident that upon charging her husband with having maintained this woman in Plainfield and with having children who bore his name he confessed that it was true.

"On April 26." says Mrs. Strauss No. 3, "my husband informed me that he had trouble with a lady client over money matters and was going to his mother's house. I have never seen him since. He left all his papers in my custody and gave me blank substitutions and other papers. Upon going through his papers I found photographs of ida M. Perkins and letters and papers disclosing the double life he had been leading."

Strauss's Life in Plainfield. Baldwin F. Strauss, his wife, Ida M. Perkins Strauss, and his two surviving children of that marriage—Baldwin F. Strauss, jr., and Florence Strauss—have resided in Plainfield, N. J., since September, 1900. On April 26 of this year Baldwin F. Strauss left Plainfield after telling his wife and family that he was in trouble over a former client, and has uble over a former client, and has not been seen since. LOST AT STUSS.

cerner of Lincoln place and Grove street. He moved in with his wife and family.

Mrs. Perkins Strauss was away from home when a World reporter called but Baldwin F. Strauss, jr., the missing man's son, said:

"It is all too true. We have had detectives searching for my father ever since his disappearance, but have been unable to find him. We are aware that Marguerite Strauss claims to be the lawful wife of my father, but my mother has a prior claim. She was duly married to him by a priest in a Roman Catholic Church in 1880. We never heard of the existence of Stella Ainsworth Strauss until my father was arrested for non-payment of alimony.

"My mother, my sister and I have learned that it was no unusual thing for my father to have all three of his wives in his office at one and the same time, and they absolutely in ignorance of the fact of the relation each held to him. I remember one occasion in particular, when I was present, in which my mother was in his inner private office, Stella Strauss was in the adioining private office, and Marguerite Strauss was in the anteroom, and he coolly drew checks to the order of each, handed one to my mother, gave two of them to his clerk and told him for heaven's sake to get rid of the two women outside."

"But Capt. Ericsson's title to fame and to the gratitude of the city does not rest alone upon the Monitor. He built the first steam fire engine, and he devised and introduced the screw as a substitute for the paddle-wheel for the propulsion of steam vessels. He was the first one to introduce forced draught on steamships from an independent engine; and he was also the first to place the engines of steam vessels wholly be-

construction and gave to man a mastery of the ocean such as he never had before.

"Well may Ericsson's statue stand here in Battery Park, where it shall ever overlook the waters of the proud harbor which his genius did so much to develop. The beat of every propeller that lashes the waters into foam will bring to him its song of praise; and the incoming and the outgoing tides, as they pays this spot, will shout in turn the chant of the world-encircling oceans as they pay tribute to the memory of him whose mastery the waters of the deep recognize to earth's remotest sea."
